

## Autechrismo applicato

Come senz'altro sapete se seguite un minimo le faccende musicali, a partire dal 5 aprile gli Autechre hanno inaugurato una [collaborazione con l'emittente NTS Radio](#) che consiste in quattro session di due ore ciascuna, l'ultima delle quali è prevista per oggi, 26 aprile 2018. A luglio le session verranno raccolte in un [corposo box](#) (12 Lp nella versione vinile, oppure «solo» 8 cd se non siete in vena di spendere 140 sterline) pubblicato com'è ovvio da Warp, ma intanto i brani finora ascoltati ci permettono di ribadire innanzitutto due cose: la prima è che, come noto da tempo, gli Autechre restano ancora «[più post-umani di te](#)»; la seconda, è che queste *NTS Sessions* rappresentano una nuova vetta nella vertiginosa discesa del duo di Manchester tra gli abissi della più irraccontabile astrattezza algoritmica.

Come raccontare dunque questo mastodonte di otto (**OTTO**) ore, al di là del particolare che si tratta quasi certamente dell'apice di quella nuova fase (la terza? quarta? Quinta?) inaugurata dalla coppia con [Exai](#) del 2013? Quali vocaboli scegliere, a quale grammatica affidarsi quando a parlarti è una lingua che, arrivati a questo punto, risponde a intelligenze talmente impermeabili all'umana finitezza da frustrare qualsiasi tentativo di racconto e descrizione? In passato [ci ho già provato](#), a dare un senso comprensibile a ciò che non chiede di essere compreso perché semplicemente è. E però non potevano che essere tentativi approssimativi, imprecisi, generici. E quindi da allora il dubbio mi attanaglia, mi corrode, mi ammutolisce: a quale alfabeto ricorrere, nel momento in cui dinanzi hai la prova di un'intelligenza talmente aliena da non contemplarti nemmeno?
